Company Profile:

Ramsun Rasayanics is established in the year **2011** as a **Partnership** firm. We are the **manufacturer, supplier, exporter, trader and importer** of a wide range of products such as **Organic chemicals, Inorganic chemicals, Perfume and fragrance chemicals, Essential oils, Active pharma ingredients (api,'s), Api intermediates and impurities, Natural products, Herbal powders, Medicinal and pharmaceuticals products, Nutraceuticals & food products, Cosmetic chemicals** and many more. This range of product categories made available to our valuable clients in milligrams to tonnage scales. We continue to be chosen as a strategic partner by various clients including abroad.

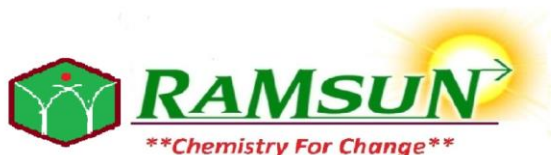

With the capability of **Dr. Ramesh, backed with (PhD) Doctoral degree** in synthetic organic chemistry and having knowledge in organic synthesis, Research & Developmental activities and experience in academic as well as chemical industry over 12-14 years, we have started our production with the establishment of **R&D Lab in Bengaluru**, where we develop the process on gram scale then carryout the pilot plant studies and finally manufacture on bulk scale in the plant level.

Dr. Ramesh is **CEO, who is** heading the firm and managing the R&D and production activities.

In addition, we take up CRO, CRAMS and job work projects with technology transfer through dossier preparations also.

We are expertise to take up following reactions starting from gram scale to bulk scale upto tonnage level production in the plant. Those reactions are Grignard reaction, Wittig reaction, Friedel- Crafts alkylation and acylation, Coupling reactions with C-C, C-O, C-N bond formation, Demethylation of methoxy groups, Natural product isolation and purification, High vacuum fractional distillation, Esterification, Ether synthesis, Oxidation reactions, Reduction reactions, alpha Chlorination and bromination of ketones, **Soxhlet** extraction so on and so forth.

We encourage projects from various chemical and pharmaceutical companies as well as academic institutions and universities for product development, process development and commercialization of products.
